

# **Divine Science**

Meru University Course #1300

## **Syllabus**

### **Co-Create with the Elohim!**

True spirituality includes a deeper understanding of science as expressed by the Creator through divine intelligence within creation itself.

The Twelve Elohim are the beings who created the physical universe as we know it—the Divine Us mentioned in Genesis, chapters 1 and 2. They will share more on the creation process and how we may invest our life energies in co-creating a beautiful new world through our own spiritual gifts—imagination, spiritual thoughtforms, alchemy, and the new science of heartstreaming.

Join David as he imparts new revelations and insights inspired by the Elohim, and then engage in lively question and answer discussion, dialogue and debate! This will be an exhilarating spiritual experience with the mighty Elohim, who provide keys for world transmutation as we work as divine scientists to transform ourselves from within.
